DIRECTOR'S MESSAGE

Dear Team,

I hope this message finds you well. As we step forward in the year, it is with immense pride and gratitude that I reflect on our company's remarkable growth and achievements. The past few months have been truly transformational, and it's important to recognize the efforts and collaboration that have brought us to this point.

One of the standout moments of this period was the wonderful and highly productive visits from key stakeholders and partners from the GCC countries. These visits were not only a testament to the relationships we have nurtured over the years but also a reflection of the trust and confidence these partners place in our organization. The discussions we held were meaningful, covering new growth opportunities, strategic collaborations, and market expansion initiatives.

"Coming together is a beginning. Keeping together is progress. Working together is success."

The insights gained from these interactions have been invaluable, and I am excited about the potential avenues we can explore in the coming months. To all those who played a role in hosting and facilitating these meetings, I extend my sincere thanks for your professionalism and commitment.

In addition, we had the distinct honor of welcoming a distinguished guest from Mexico to our office. This visit was another important step in broadening our global network and expanding our influence in international markets. The exchange of ideas, experiences, and strategic insights during this visit was truly inspiring. Our discussions with our guest focused on fostering innovation, exploring new markets, and identifying synergies that can drive mutual growth.

This collaboration has the potential to open new doors for us in Latin America and beyond, and I am confident that it will bear fruitful results in the near future.

Looking back at these significant engagements, it is clear that our company's global presence and reputation are growing stronger with each passing day. This is a testament to the hard work, dedication, and passion of every team member. I want to express my deep appreciation for your continued efforts and for embodying the spirit of teamwork that makes these accomplishments possible.

As we prepare for the opportunities ahead, let's remain focused, innovative, and driven. Together, we are not just achieving growth, but we are shaping a future full of promise and potential.

Thank you for your unwavering commitment, and I look forward to even greater successes in the months to come.

BUSINESS NEWS

3D Iron Technologies Pvt. Ltd. Obtained ISO 9001:2015 from SIS Certifications

The heartiest congratulations to 3D Iron Technologies Pvt. Ltd. for successfully achieving IAS-accredited ISO 9001:2015 certification. With this, they have established assurance towards the Quality Management System.

The scope of 3D Iron Technologies Pvt. Ltd. covers Design, Development, Manufacturing and Supply of Aviation and Defence parts.

Transforming Vision into Reality: NAAC to Reform the Higher Education Accreditation

Transforming Vision into Reality: NAAC to Reform the Higher Education Accreditation.

The Government of India (GoI) introduced the National Education Policy 2020 to reform the Indian education system to make it more inclusive and flexible, focusing on learners' holistic development. The vision of the National Education Policy encompasses several key objectives:

Revamping the Curriculum: The National Education Policy (NEP) focuses on introducing a curriculum to facilitate critical thinking, creativity, and life skills among learners. As a result, it moves the education system away from rote learning.

Holistic Development: The new education policy focuses on the holistic development of students by providing them with personalized learning experiences. Moreover, it makes the education system more inclusive and quality-oriented by ensuring mental and physical well-being, not just academic achievements.

Implementing ISO/IEC 27701 Standards in Small and Medium-Sized Enterprises in Saudi Arabia

As Saudi Arabia pursues its ambitious digital transformation under Vision 2030, the significance of protecting personal data has never been paramount. As organizations increasingly rely on digital technology, the dangers of data breaches and cyber-attacks have grown. Navigating Saudi Arabia's complicated terrain may be especially difficult for small and medium-sized firms (SMEs). Implementing ISO/IEC 27701 Privacy Information Management System (PIMS), an extension of the internationally renowned ISO/IEC 27701 standard, creates a strong foundation for protecting personal data protection. This article digs into the advantages, obstacles, and implementation techniques of ISO/IEC 27701 for Saudi SMEs, providing actionable ideas for improving data privacy policies.

The Impact of ISO 27701 on Business Growth

Today's business environment cannot be overemphasized without a consideration of privacy and data protection. This is especially due to the growing importance of data privacy and regulations across the world hence the need for organizations to fully embrace proper data management.

Such a framework that has emerged and has received popularity in the recent past is the ISO 27701 which is an extension of the ISO 27001 and it focuses on the requirement for PSD and aims at offering guidelines for a Privacy Information Management System or PIMS. This standard is useful in organizations' handling of personal data besides compliance to data privacy laws such as the CMMI, SOC, GDPR.

ISO/IEC 27701 does not only enhance an organization capability towards the protection of privacy but also has a central role in the advancement of the business. ISO/IEC 27701:2019 certification paves way for organizations to gain a good reputation, improve processes, and gain new business opportunities.

The Integration of Artificial Intelligence in Medical Devices

The artificial Intelligence market is expected to reach \$93 billion by the year 2023; hence, it is expected to increase by 12% from 2022. AI will transform the dynamics of the education sector, defence sector, and healthcare industry, including the medical devices industry.

Artificial Intelligence for medical devices performs three main functions. These three are:

1. Chronic Disease Management -

Artificial Intelligence is capable of monitoring a vast number of patient's data. Furthermore, it also provides an appropriate treatment plan to cure the disease based on the client's medical history.

2. Medical Imaging -

AI in the medical devices industry aims to build a better medical imaging system to generate images of better quality and clarity. Moreover, it would reduce patient's exposure to radiation.

3. Internet of Things (IoT) -

It establishes a system of wireless, interrelated, and connected digital device systems. Additionally, it helps to smoothen the data management process. It reduces the cost of managing and monitoring patient data and enhances work efficiency.

ACHIEVEMENTS

SIS Certifications Proudly Certifies Air Force Administrative College with ISO 21001:2018.

ISO 21001 provides a management system framework for educational organizations to improve processes, learner satisfaction, and overall performance.

SIS Certifications is honored to announce a significant milestone in its journey of promoting excellence in educational management. We are proud to have certified the prestigious Air Force Administrative College (Indian Air Force) under the globally recognized ISO 21001:2018 standard for Educational Organizations Management Systems (EOMS). This certification emphasizes the college's commitment to delivering high-quality educational and administrative services, tailored to the unique needs of its stakeholders. The momentous occasion was graced by the Managing Director of SIS Certifications, Mr. Arunendra Divedi, who personally visited the Air Force Administrative College to present the certification.

"Education is the most powerful weapon which you can use to change the world."

Mr. Divedi commended the college for its consistent efforts in maintaining excellence in education and training, particularly for one of the nation's most esteemed institutions, the Indian Air Force. His presence marked a proud moment in the collaborative effort to ensure that the college continues to uphold international standards in educational practices and operations. ISO 21001 certification is specifically designed to enhance the learning experience, improve performance, and foster effective communication between educational institutions and their stakeholders. By achieving this certification, the Air Force Administrative College demonstrates its unwavering dedication to providing an environment that supports continuous learning, skill development, and operational efficiency for the Indian Air Force personnel.

ISO 21001 establishes a management system for educational organizations, ensuring consistent quality, learner satisfaction, inclusivity, and improved educational outcomes.

At SIS Certifications, we take immense pride in being part of this journey, supporting organizations in meeting international standards and achieving excellence. This certification is a testament to the college's leadership and vision, and we look forward to witnessing their continued success in shaping the future of Indian Air Force officers.

ISO 21001 is a standard for educational organizations that focuses on improving quality, learner satisfaction, inclusivity, and educational outcomes. It provides a management system framework to enhance teaching, learning processes, and organizational efficiency.

ACHIEVEMENTS

SIS Certifications Hosts Mexican Delegates for ISO 37001 Certification Ceremony

SIS Certifications recently had the honor of hosting esteemed guests from Mexico for a significant certification ceremony. The event celebrated the successful ISO 37001 certification of **Organo Interno de Control del Instituto Nacional de Estadística y Geografía (INEGI)**, Mexico's national statistical and geographical institute.

“ISO 37001 provides a framework that organizations can adopt to prevent, detect, and address bribery in all its forms.”

ISO 37001 is a globally recognized standard for anti-bribery management systems. It aims to help organizations establish, implement, and maintain procedures to prevent, detect, and address bribery. By achieving this certification, INEGI has demonstrated its unwavering commitment to ethical governance, transparency, and accountability.

“Implementing ISO 37001 demonstrates an organization’s commitment to ethical practices and integrity, fostering trust among stakeholders.”

This achievement further strengthens the organization’s ability to manage risks related to bribery and enhances its reputation on the international stage.

The certification ceremony marked a milestone in the collaboration between SIS Certifications and INEGI. The Mexican delegates were warmly welcomed and engaged in insightful discussions about compliance, governance, and best practices in anti-bribery management. During the ceremony, the delegates expressed their gratitude for the partnership and emphasized the importance of adopting international standards like ISO 37001 to ensure operational integrity.

“Organizations that adopt ISO 37001 not only protect themselves from legal risks but also enhance their reputation in the marketplace.”

ACHIEVEMENTS

SIS Certifications Hosts Mexican Delegates for ISO 37001 Certification Ceremony

SIS Certifications, known for its expertise in ISO standards, guided INEGI through the rigorous process of certification, helping them meet the necessary requirements and align with global best practices. The ceremony concluded with the presentation of the official ISO 37001 certificate, symbolizing INEGI's commitment to upholding ethical practices and further fostering its role as a trustworthy national institution.

"With ISO 37001, organizations can develop a robust anti-bribery policy that can adapt to changing regulatory environments."

This collaboration underscores the importance of international cooperation in promoting transparency and governance across borders, showcasing the vital role of certification bodies like SIS Certifications.

"Achieving ISO 37001 certification is a mark of excellence that demonstrates an organization's dedication to preventing bribery."

SIS Certifications Hosts Webinar on International Practices Against ISO 37001 with Mexican Clients

SIS Certifications recently hosted an insightful webinar titled **“International Practices Against ISO 37001,”** which focused on anti-bribery management systems and global best practices. The event brought together clients from Mexico, including top professionals from **The Instituto Nacional de Estadística y Geografía (INEGI)**, along with legal experts and compliance leaders.

“ISO 37001 serves as a global benchmark for organizations seeking to establish a culture of integrity and ethical behavior.”

The webinar featured a distinguished panel of speakers, including **Manuel Rodriguez Murillo, Head of Organo Interno de Control (OIC) at INEGI**, who discussed INEGI's implementation of ISO 37001 and its role in fostering transparency within the organization.

“ISO 37001 encourages organizations to go beyond mere compliance, fostering an environment where ethical decision-making is prioritized.”

Leonel Antonio Vazques Briceno, Head of Complaints, Investigations, and Asset Evolution at INEGI, shared insights into the investigative mechanisms used to ensure compliance with anti-bribery standards. **Jorge Arturo Ventura Alfaro, Head of Responsibilities Area at OIC of INEGI**, provided a detailed overview of legal accountability and enforcement under ISO 37001.

The event also featured **Rafael Francisco Ortiz De La Torre** and **Paola Martinez Rodriguez, Founding Partners of DEECC**, who shared their expertise on the legal framework surrounding ISO 37001 and the strategic importance of adopting anti-bribery management systems in both public and private sectors.

Monica Florentina Fiesco Chicho, General Director of SIS Cert International Mexico, moderated the event, while **Kajal Yadav, Sales Manager**, and **Surbhi Sharma, Marketing Head** at SIS Certifications, served as event anchors. The event was organized under the guidance of **Mr. Anish Kumar, Senior Sales and Marketing Manager**, **Mr. Prabhat Mishra, Director of Operations**, and **Mr. Arunendra Divedi, Managing Director of SIS Certifications**.

The webinar emphasized the critical importance of international collaboration in promoting ethical practices and compliance, highlighting how ISO 37001 serves as a vital tool in combatting bribery and corruption across industries and nations.

SIS Certifications' Managing Director Mr. Arunendra Dvivedi's Successful Business Visit to GCC Countries

SIS Certifications, a leading global certification body, marked a significant milestone with the recent visit of its Managing Director, Mr. Arunendra Dvivedi, to the GCC (Gulf Cooperation Council) countries. The primary objective of the visit was to explore new avenues for business growth and strengthen the company's foothold in the region.

"Traveling through the GCC countries for business reveals not just markets, but a network of partnerships built on trust and excellence."

During the trip, Mr. Dvivedi held extensive meetings with key industry leaders, partners, and potential clients across various sectors. These discussions centered around expanding the certification services offered by SIS Certifications, which include ISO standards across quality management, environmental management, health and safety, and information security, among others.

With a growing demand for globally recognized certifications in the GCC, the visit opened numerous doors for collaboration, especially in countries like the UAE, Saudi Arabia, Oman, and Qatar. These markets, driven by their increasing emphasis on quality standards and international compliance, are highly promising for SIS Certifications.

Commenting on the successful trip, Mr. Dvivedi said, "The GCC countries represent a significant opportunity for SIS Certifications. The positive reception we received reinforces our commitment to supporting businesses in this region to achieve their certification goals."

The success of this business trip signals a strong future for SIS Certifications in the GCC, and the company looks forward to establishing long-term partnerships that will foster growth and quality excellence in the region. As SIS Certifications gears up for further expansion, the visit paves the way for delivering world-class certification services to businesses across the Gulf.

UNDERSTANDING ISO 37001:2016 - ANTI-BRIBERY MANAGEMENT SYSTEM

In today's highly competitive business landscape, maintaining integrity and trust is crucial for sustaining relationships with stakeholders. Bribery and corruption, however, pose significant risks that can damage reputations and lead to severe legal repercussions. The ISO 37001:2016 Anti-Bribery Management System (ABMS) provides organizations with a globally recognized framework for preventing, detecting, and addressing bribery.

This newsletter highlights the key aspects of ISO 37001:2016, its benefits, and its role in fostering transparency, trust, and ethical business practices.

What is ISO 37001:2016?

ISO 37001:2016 is an international standard designed to assist organizations in establishing, implementing, maintaining, and improving an anti-bribery management system. The system is applicable to all organizations, regardless of size, industry, or geographical location. It sets out requirements and provides guidance for preventing bribery in both public and private sectors.

"Bribery undermines trust, and ISO 37001 helps build a culture of integrity."

The standard focuses on:

- Anti-bribery policies and procedures
- Leadership commitment and responsibility
- Employee training and communication
- Third-party due diligence
- Investigation, reporting, and monitoring systems

"ISO 37001 is a game changer in the fight against bribery."

Key Elements of ISO 37001:2016

1. Leadership and Accountability

Strong leadership commitment is a cornerstone of ISO 37001:2016. The top management must actively promote a culture of ethics and transparency. They are responsible for ensuring compliance with anti-bribery policies, allocating necessary resources, and continually improving the management system.

2. Risk Assessment and Due Diligence

Organizations are required to assess bribery risks and perform due diligence on projects, suppliers, and business associates. This helps identify potential risks early on and allows for informed decisions to mitigate them.

3. Policies and Procedures

The establishment of clear, documented anti-bribery policies and procedures is essential. These guidelines must cover all aspects of the organization, including financial transactions, procurement, and interactions with external partners.

UNDERSTANDING ISO 37001:2016 – ANTI-BRIBERY MANAGEMENT SYSTEM

"Bribery undermines trust, and ISO 37001 helps build a culture of integrity."

4. Training and Awareness

Regular training programs are a key component of ISO 37001:2016 compliance. Employees at all levels must be educated about the risks of bribery, the company's anti-bribery policy, and how to recognize and report any suspicious activity.

5. Monitoring and Continuous Improvement

ISO 37001:2016 promotes the implementation of monitoring mechanisms to detect and address instances of bribery. Organizations should also review and improve their anti-bribery management system regularly to ensure its effectiveness.

Why Implement ISO 37001:2016?

1. Enhances Reputation

Achieving ISO 37001 certification demonstrates an organization's commitment to maintaining ethical practices and integrity. This enhances its reputation among clients, partners, and regulatory authorities.

2. Reduces Legal and Financial Risks

Implementing ISO 37001 helps organizations mitigate the risk of bribery, thus reducing the likelihood of legal penalties, financial losses, and reputational damage.

3. Strengthens Stakeholder Confidence

ISO 37001 builds trust with customers, investors, employees, and other stakeholders by showing that the organization prioritizes anti-bribery and ethical practices.

4. International Recognition

As a globally recognized standard, ISO 37001 certification can open doors to new markets, especially where anti-corruption legislation is a key consideration.

ISO 37001: A Case Study

A leading multinational corporation faced potential reputational damage due to a bribery allegation. By implementing ISO 37001, the company restructured its anti-bribery policies, trained employees on ethical conduct, and established a rigorous monitoring system. The certification not only helped in improving internal processes but also restored confidence among clients and stakeholders.

EMPLOYEE TESTIMONIAL

Vineet Pandey
Operations Executive

As I mark my first anniversary as an Operations Executive with the SIS Certifications, it is a fitting moment to reflect on the journey thus far. The past year has not only been a period of professional development but also one of personal growth and profound learning.

The SIS Certifications has equipped me with essential skills and knowledge that have significantly enhanced my ability to manage operations effectively. Engaging with industry best practices, I have acquired a deep understanding of operational workflows, efficiency optimization, and team management. These competencies are vital in our ever-evolving industry landscape.

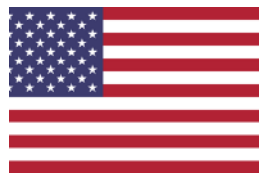

Throughout this year, I have had the privilege of collaborating with talented colleagues who share a commitment to excellence. Their insights and support have further enriched my experience, demonstrating the value of teamwork in achieving common goals.

In conclusion, my journey over the past year as an Operations Executive with the SIS Certifications has been transformative. I look forward to leveraging my experiences and continuing to contribute positively to my organization and the broader community in the years to come.
